

# THIS IS PREEM

Petter F. Holland

Preem CEO

Oslo, November 24th 2016

# An important contributor to society

- We refine and sell gasoline, diesel, renewable fuels, gas, and heating oil.
- One of Sweden's largest producers of renewable fuels.
- Two refineries on Swedish west-coasts with total capacity of 18 million tons/year.
- Preem has 80% of Swedish refining capacity, and 30% of Scandinavia's refining capacity.
- One of Sweden's largest exporting companies.
- Preem supplies 15% of Sweden total energy.
- Preem supply 50% of all petroleum products sold in Sweden.
- Renewable fuels accounted for 15% of Preem's fuel sales in 2015.
- Comprehensive station network with 570 stations
- Preem supplies nearly half of Sweden's industrial companies with heating and energy products.
- Depot in Sandefjord since 2016.

Our vision:

Preem leads the transition  
towards a sustainable society.

# Our mission and long term target

## **Mission:**

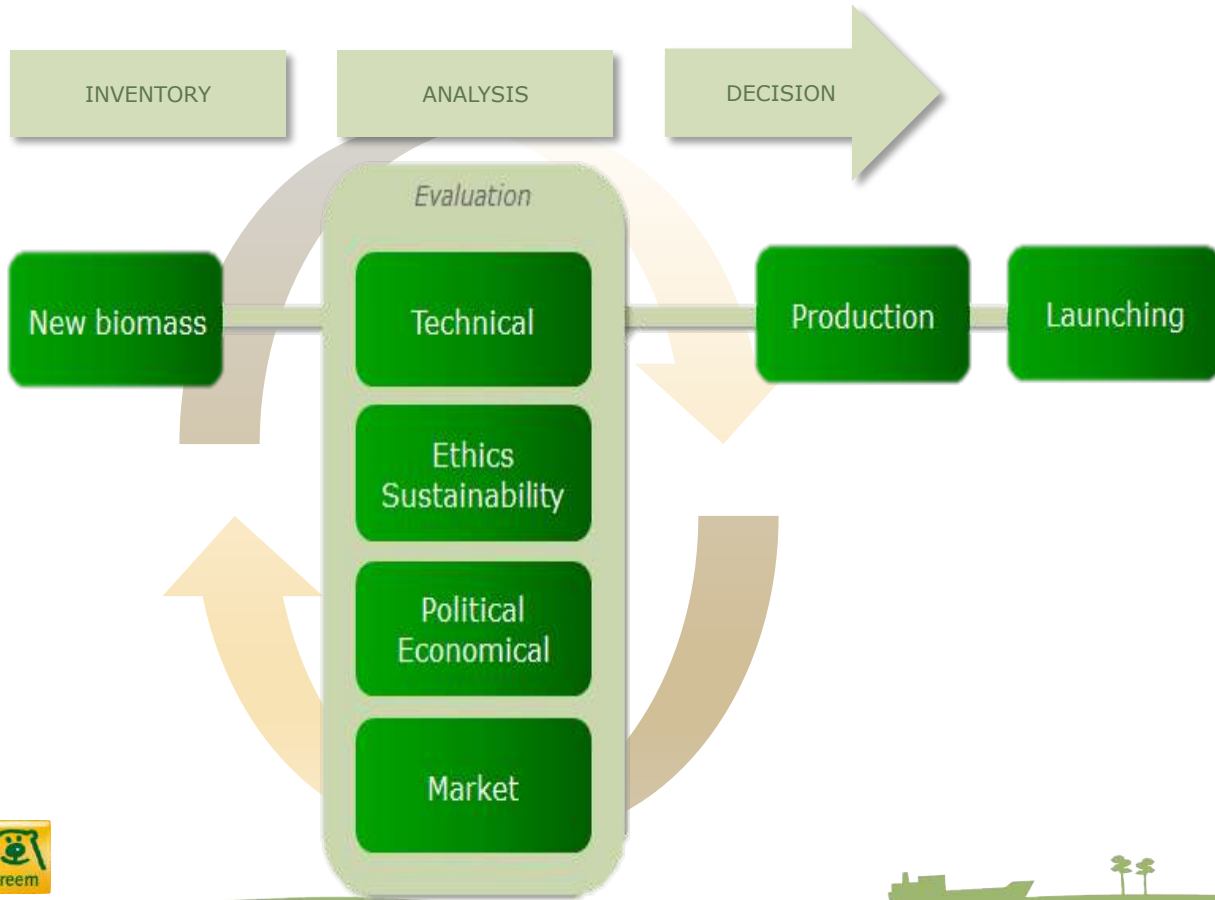

- Replacing fossil crude oil with renewable feedstock
- Increase sales of renewable fuels

## **Long term target:**

In 2030 , we will produce at least 2.5 million m3 of renewable fuel

# Preem Sustainability System (PSS)

## “The Generation Goal”

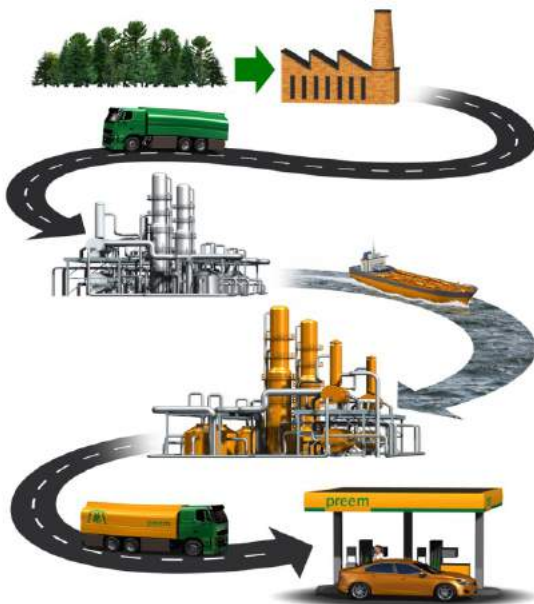

The overall objective of the Swedish environmental policy is to hand over to the next generation a society in which the major environmental problems in Sweden have been solved -- without increasing environmental and health problems outside of Sweden.

## From tall oil to diesel since 2010

Residuals from pulp industry

Locally pre-refined from tall oil to TOFA (Tall Oil Fatty Acids)

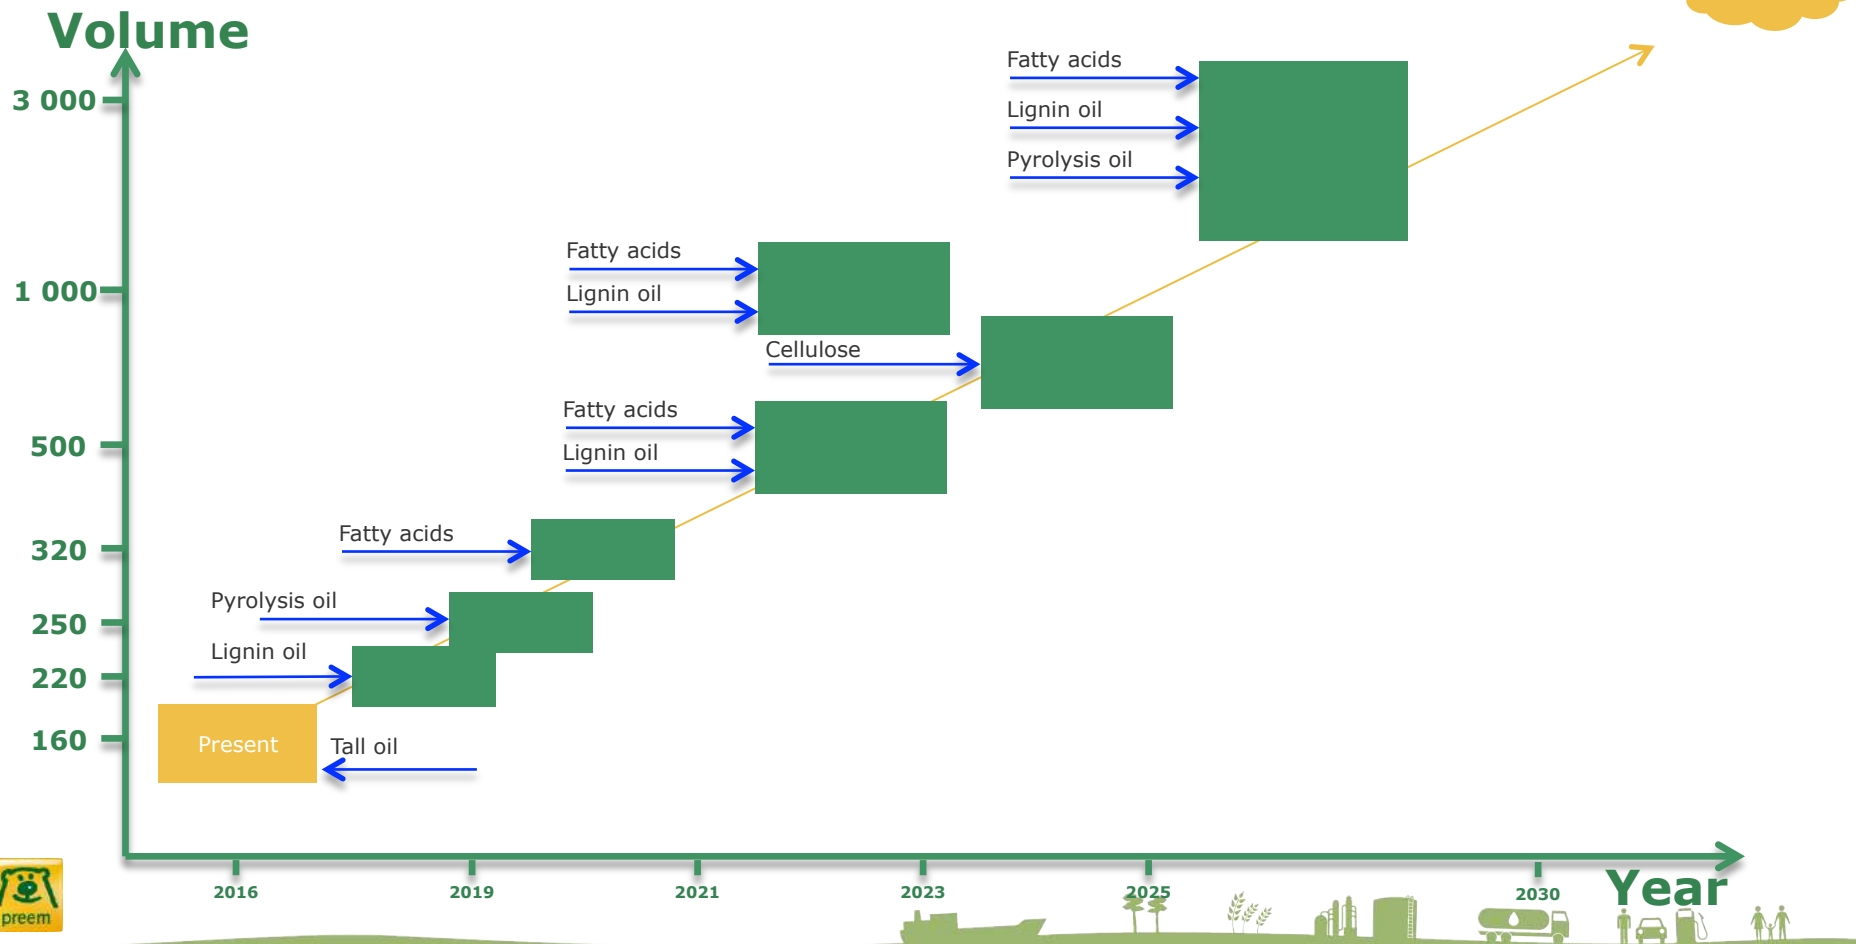

TOFA is refined further into standard diesel in our conventional Preem Gothenburg refinery.

## Preem Evolution Diesel + Launched 2016

# Preem's renewable refining 2030

Thank you!
